A Natural Remedy

Time was when disease was thought to be due to the direct influence of evil spirits, and exorcism and magic. were invoked to cast it out.

Science has taught us wisdom. The evil spirits exist still. We call them "Disease Germs," and they also must be cast out. Once lodged in the stomach or intestines, fever with its ballucinations, or biliousness with its aches and pains, is the result.

ENO'S FRUITSALIT

is the approved remedy for driving out disease germs. Its action is quick and thorough. It clears the intestines, rouses the torpid liver to new life, stimulates the mucous membrane to a healthy action, and cleanses and invigorates the whole digestive tract:

It may be safely taken at any time by young

It is very effective in the early stage of Diarrhaea by removing the irritating cause.

GERMAN CONCEAL-MENTS.

THE CASUALTIES

The mixture of frankness and concestment: the extraordinary promptness in flashing victories round the world, and the lelay in issuing attenuated admissions of defeats are pizzling to those who do not understand the German mind.

Added to this is the policy of never exaggerating real successes. The official announcements of the taking of Antwerp and Warrent warm breefty itself.

and Warsow were brevity itself. more words, were lavished on those subjects than on the defeats off the Falkland Isles and at Tsing tan.
The whole operation of news publishing is simed—not at the Germans—but at neutral countries. It is not, indeed, too much to say the mind of the Wilhelmsrasse has been bent upon influencing Sweden, Denmark, Holland, Switzerland Bulgaria, and Roumania—formerly also Turkey and Italy. If continued silence about the Riga sea fight be maintained German prestige will suffer a sever, blow in

PRAIL OF WIFTER CAMPAIGN. It is not difficult to discover broadly the cason for the intentional conseniments of he Germans. They are hiding the fact hat, while they have made every proparation for it, they do not want another winter campula. To me this is not an ndication of the shortage of ford or cotton. -of the latter they have laid in during the last few months a gigantic store or of indismibber of which they are distinctly not destitute. It is an indication that the momory of last winter round Dixmode is a nightmare among the whole German Army. Austria will never forget her winter in the Car athians, or Germany the losses in the Ypres district. Une or two sospensions of the Porseasts wered I believe due not to political expressions what to the

publication of expressions of detestation on the part of German soldiers of the horrors of the wet trenches in front of the British and Belgian Armies. It is never worth while to trust the word

of a German Socialist, for his views are always tinetured with which, though they do not prevent him voting for the war like any other German, obscure his judgment as to the course of the war. Socialists have hinted to me that, when the German losses become known, the German peoples will units to destroy the governing clique who brought about the war. I am simil I have little faith in that theory I was one of the e who for years buped against hope that whom the issue of peace and war came German Socialists would—as they had often informed me—stand firm; but when German Socialists, with the exception of Liebknecht and a few others, are Germans first and Socialists afterward.

DATMEAL PORRIDGE. Recent reports of medical officers. health in England have lamented the culinary ignorance of the poor, who have little knowledge of the cookery art or food values. Such ignorance is notorious

amongst the London- poor, but also apparently prevails in the provinces. D Anderson, a prominent medical officer of health, for example, comments upon th prejudice against porridge, mentioning that it had to be ere uded from the menu at the children's feeding centre and the fever hospital under his charge. Yet he describes it as "a most valuable bone and brain forming fond." The fact is that the English still regard porridge as prison diet. This projudice in England is scarcely to be wondered at when we remember that in Scotland we are forgetting the virtues

of our old national dish. In an article on food economy the "Glasgow Herald says-The Scotch are not by nature adepts in cooking. There are some national dishes which almost every Scutswoman can make. and make well. RUSSIANS ADVANCE FOUR MILES.

ENEMY'S FIRST AND SECOND POSITIONS CAPTURED.

London, Det. 11.

Experts at Petrograd point out that the Germans in the Dvinsk region have tailed to outflank the Hussians, and have now, shortened their front from seventy to twenty-seven miles, making stubborn frontal

attacks at ghastly cost. The Russiaus, under General Evert, are growing stronger and are everywhere pressing the energy back both in the Dvinsk region and southward towards Galicia, capturing thousands of prisoners.

A strong attack near the River Styr on Thursday night resulted in ·a Russian advance of four miles and the capture of the enemy's first and second positions.

A feature of the Russian operations is the daring night bayonet attacks, which give the Germans no respite.

THE INVASION OF SERBIA.

GERMANS HAVE MANY TWELVE-INCH HOWITZERS.

Lospon, Oct. 11. It is announced to-day, that the Germans invading Serbia have many

THE CAPTURE OF TAHURE HILL.

"EYE-WITNESS" DESCRIPTION.

The French "Exe-Witness," declares that the capture of Tabure Hill was the result of strong artillery preparation preceding brave attacks. The enemy's trenches were everywhere choked with corpses. Seven lines of trenches echelonned on a depth of three kilometres had to be carried, but thanks to the artillery work this was done with comparative ease." German prisoners, suffering from hunger and thirst, said that part of the garrison at the village of Tahure actually took panic and described, owing to the violence of the fire. The Germans' terrific efforts on October 10th to retake the hill did not gain an inch, and only resulted in a costly defeat.

GERMAN COUNTER-ATTACKS RESULT IN "COMPLETE AND

COSTLY DEFEAT."

Pants, Oct. 11.

A communique states that recent Gorman artillery action has been of only fair intensity. The French batteries replied everywhere very effectively. The communique adds that fresh reports confirm the news that the violent counter-attacks by the Germans during the last few days against the British and French fronts before and northward of Loos only resulted in complete and coatly defeat. The principal assault was made by three to four German divisions. These were completely repulsed and dispersed. The number of dead in front of the Allied lines is estimated at seven or eight thousand.

ANOTHER MISSING.

Early in September the Christian workers from the five districts covered by the Baptist Mission gathered at Ying-tak for their autumn class meeting. These workers are the preschers, colporteurs, Bible

women, and leading Christians from the various churches and out-stations in the five districts east of Ying tak. They were at Ying-tak city with the missionary conferring about the work and studying for about two weeks. After the class closed one group of the Christians were travelling near the border of the Ying-tak district when they were attacked by a band of robbers, one of the Christians was killed and several were bound and robbed, and badly treated. One of the preachers returned to Ying tak city to report the incident to the Magistrate, and, as he was returning to his home, he was taken by the robbers and his whereabouts have not been known since. He is either killed or held for ransom or to prevent him a from giving evidence against, the robbers. The whole country north and east of Ying-tak seems to be in a very serious

A MINISTER TO RESIGN.

The Minister of Finance, Hole Hi,

intimates that he will resign.

THE SELECTION OF YOUTHS FOR FIGHTING AND MANU-FACTURING.

At the commencement of the war L rd Kitchener asked for an army such as the most militant Englishman had never deemet possible of attainment in this country. The nation, however, responded nobly t he call, and hundreds of thousands joined the ranks. The cry of the newspapers and the posters was for men and more men. We were never told how memy had joined, but it was officially stated once or twice that the recruiting was satisfactory. Then ramours began to pass from mouth to mouth -first, to the effect that there were more recruits than rides for them, and, later, that the trained soldiers were short of ammunition. Before this, however, pressure had" been quietly put on certain manuficturers to increase the size of their works and to install more machinery, and then it was found that many of the mon under training, or actually in the trunches, were needed to work the machines or to control operations. It was thus brought home to the authorities that it would have been better if the enthusiasm of the young men of the quantry had been directed into appropriate channels, and if they had not been invited wholesale to serve in one capacity only. At the present moment the public attention is largely concentrated on numitions, but the recruiting sergeant is still at work, and quite naturally, in the absence of definite instructions from his superiors, he undesvours to get as many men as he can, irrespective of their individual qualities. After having made two blunders, it would be well if these responsible could now take a wider view than they have done in the past, and give some attention to the consequences of the war, which will inevitably make themselves folt when peace is proclaimed, if we entitud to be obsessed by one idea at a time.

If we urge that consideration must be given to the post bellum conditions, it must not be thought that, even for a moment, we ancourage in the slightest degree any interference whatever with the dominant duty of the State to fulfil completely the task throat upon it by the aggressive Middle-European States in August last. All the resources of the mation must be concentrated upon the overthrow of the enemy, and, naturally, a great part of the burden of service and sacrifice must fall upon youth. At the same time it is wise that each unit of the public should be chosen for that function for which he (or she) is best suited, not only by reason of physical qualities, but also by mental capability. Quite recently we contended for co-ordination of the effort everyone towards the common object, a condition which, there is a steadily growing belief, involves the fusion of the industrial and the fighting, armies. Broadth and depth have been given to this growing belief by the speeches made by the Minister of Munitions since we wrote our article, and it is to be enruestly hoped that Mr Lloyd George will be able to carry out his aspirations to the fullest possible extent, notwithstanding the marmy of disapproval-heard in the House om a few members who seem to have fah.d to realise that the extremity of the task imposed upon the Allies demands the imposition of extreme measures during the progress of

In giving effect to the required national organisati n. - in order to utilize to the fullest extent the whole of the resources of the nation-mechanical, mental, and muscular-it is of the greatest importance that the qualities of each individual should betiken into consideration. Our authoris ties began by urging every man to be a soldier. Now there is danger of the recruiting sergeant and the manufacturer competing sminst each other, without any considerstion of the aptitudes of the individuals they address. Such a course is likely to end in many men going to the trenches who would do infinitely better work in the shops, and of some very I kely soldiers staying at home. We do not seek to make any comparison between the two; wa only plead for the energies of the individuals concerned to be guided in the direction most useful to the country, both now and in the future.

And here we may point out that the differentiation which we are advocating should not be confined to men of the artisan class. The extension of our factories, the adoption of night work—and in many cases of Sunday work also—has 8.50 p m .- A. G. Suffied, Hashan Khan. thrown exceptionally severe stress upon works, managers and their maistants, as welles on the shop foremen and inspectors of various grades, and there can be no doubt that in many instances the output, both as regards quantity and quality, bas fallen below that which could have been 5.50-Kim (8) Maxwell (8) Inspector secured by an adequate supervising staff. In any regulations for controlling the character of our recruiting, therefore, and in correcting orcors already committed, aftention should be given not only to the rank and file of our army, but also to the qualifications of the young officers who have been and are being, enrolled in such large num bors .- Engineering.

HONGKONG TIDES.

The tide-table given below has been sompiled at the Nautical Almanse Office in London from the result of the analysis of observations taken by means of an automatic tide-recording machine in the Wa ter Police Basin at Taim Sha Taul during the years 1887-8-9.

The zero of the table corresponds with the zero of the sounding in the Admiralty Chart, which has been found to be a feet S inches below mean sea level To obtain the depth of water on the tide gange: 25 the Victoria Naval Yard add 3 feet & inches, and on the gauge at Lamont Dock, Aberdeen, add 10 feet 6 inches bo the height given in the table.
